Ejemplo de uso real

Aquí tenéis un ejemplo en el que una variante de este modelo que permite tener recogida la gotek en el hueco que hay detrás de mi Amstrad CPC.

Como veis el modelo base, es eso, una base para hacer la funda como cada uno quiera, o pueda, si usa el stock de piezas que tiene disponible como en este ejemplo en el que también he aumentado la altura de las patas para mejor ajuste.

La imaginación es el límite. :D
